DevOps Engineer Linköping, Sweden

Would you like to be a part of our journey to create a world unique “Globe in 3D” based on satellite imagery? Would you like to work in a global organization with highly competent colleagues? Are you a curious, dedicated software developer who want to work with cutting edge technology? This might be the position for you!

Maxar is currently seeking DevOps Engineer to join our R&D center in Linköping, Sweden.

Life with us
Maxar is a large corporation with the feel of a small company. We invest in creating an environment where all employees can grow, learn and have fun together. We believe in timely, transparent communication, and short decision paths. We know decisions are best made by the people closest to the tasks, and you will have a chance to influence and take on responsibility. To create our solutions we have a close cooperation with our US based colleagues.

Our solutions
Our visualization platform offers unique 3D geodata with the world's highest quality based on commercial satellite images. Our 3D analyses and data models offer decision-makers all over the world a very accurate 3D basis for use in areas such as security, defense, and infrastructure.

What you’ll do day-to-day (with your colleagues):
As a DevOps engineer, you will work together in a small team supporting development teams with both hands on setting up and managing test environments, as well as looking ahead how to improve our tools and test methods with a more strategical mindset. Since we develop a big variety of products and services you will need to be able to understand the needs of the organization and together with your experience produce good solutions to fit the needs of today and tomorrow.

Minimum requirements:
- This position involves work with classified information where you are required to complete and be approved in a security check by a Swedish authority
- Bachelor’s degree in computer science or related area
- Minimum of 5 years of professional experience in Continuous Integration
- Demonstrated fluency in English, both oral and written

Preferred qualifications:
- Git, Gitlab, Jenkins, Docker, CMake, C/C++, Python, Windows, Linux
