Software Developer – 3D Visualization

Would you like to be a part of our journey to create a world unique “Globe in 3D” based on satellite imagery? Would you like to work in a global organization with highly competent colleagues? Are you a curious, dedicated software developer who want to work with cutting edge technology? This might be the position for you!

Maxar is currently seeking Software Developer to join our R&D center in Linköping, Sweden.

Life with us
Maxar is a large corporation with the feel of a small company. We invest in creating an environment where all employees can grow, learn and have fun together. We believe in timely, transparent communication, and short decision paths. We know decisions are best made by the people closest to the tasks, and you will have a chance to influence and take on responsibility. To create our solutions we have a close cooperation with our US based colleagues.

Our solutions
Our visualization platform offers unique 3D geodata with the world's highest quality based on commercial satellite images. Our 3D analyses and data models offer decision-makers all over the world a very accurate 3D basis for use in areas such as security, defense, and infrastructure.

What you'll do day-to-day (with your colleagues):
As a Software Developer with us, you will work in agile teams with 3D visualization. The SW development is mainly in C, C++ and OpenGL; mostly in a Linux environment. Your work also includes conducting a dialogue with stakeholders and transforming their requirements and wishes into a realized product.

We are leading the 3D Visualization and 3D analytics development with real life sensor data. This involves high end graphics computing, optimization of 3D visualization in OpenGL, visualize GIS content all in a living 3D Globe.

Minimum requirements:
- MSc degree in computer science, electrical engineering, media, or related area.
- Minimum of 4 years of relevant professional experience.
- Demonstrated experience in each of the following:
  - C and C++
  - OpenGL
  - Linux
- Demonstrate fluency in English, both oral and written.

Preferred qualifications:
- Experience in 3D visualization processing
- System design for software products
- GIS data
- Some positions involves work with classified information where you are required to complete and be approved in a security check by a Swedish authority
